

# Project Financing

Infrastructure development provides for public welfare, drives economic growth and connects communities. Funding these immensely important projects is a critical step to ensuring their long-term viability.

We assist our clients with the crucial financing issues associated with infrastructure development. We help clients determine which financing options best suit their needs and goals. We have experience advising clients in the use of:

- Municipal finance
- GARVEEs (grant application revenue vehicles)
- GANs (grant anticipation notes)
- Federal grant programs
- Private activity bonds (PABs)
- TIFIA credit (Transportation Infrastructure Finance and Innovation Act)
- Local option sales taxes
- Benefit assessment districts
- Mello-Roos districts
- Special tax districts
- Enterprise revenue sources
- Tax increment financing
- WIFIA loans (Water Infrastructure Finance and Innovation Act)
