

Water Litigation

We work with clients to craft strategies that avoid costly and disruptive disputes.

When litigation is unavoidable, we have a successful track record in litigating a wide range of water law and other environmental issues, including:

- Water rights adjudications
- Groundwater contamination
- Utility rate cases
- Disputes over the exportation of water
- Defense of and challenges to state enforcement actions
- Groundwater regulation disputes
- Contested water quality matters
- Toxic tort lawsuits and private cost recovery actions
- Disputes over water charges and California Proposition 218
